

AIRCOMATIC™ HVAC SERVICE

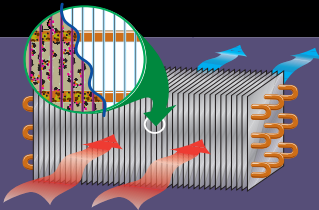

The interior environment of your vehicle doesn't have to be permeated with unpleasant odors. Have your vehicle treated with Wynn's® AIRCOMATIC™ Ultrasonic HVAC* Cleaning System.

Complete Automotive Maintenance Programs

*Heating, Ventilation and Air Conditioning

THE PROBLEM

- Stale and otherwise objectionable odors often collect in automotive heating, ventilation and air conditioning systems. These odors are sent into the vehicle's interior whenever the fan is operated.
- Stale odors from tobacco, spilled food, beverages, fluids and other sources build up in the upholstery, carpeting and headliner.
- Moisture from leaks in the vehicle's body, or moisture introduced from wet shoes and boots, can also collect in vehicle surfaces such as carpeting and upholstery and cause objectionable odors.

THE SOLUTION

Wynn's® AIRCOMATIC™ Ultrasonic HVAC Cleaning System and AIRCO-CLEAN™ Service.

- The Aircomatic unit uses ultrasonic technology to atomize the AIRCO-CLEAN liquid into a fine mist that circulates through your vehicle's heating, ventilation and air conditioning (HVAC) system and then fills the vehicle's interior.
- The ultrasonic mist eliminates stale and otherwise unpleasant odors from the vehicle's heating, ventilation and air conditioning system.
- Also eliminates most odors in carpeting, upholstery and headliner associated with tobacco, spilled food and beverages, and other sources.
- Designed to eliminate stale vehicle interior odors in general.
- Ideal for reconditioning used vehicles to provide a fresh and clean smelling interior environment.
