

PRODUCT SPECIFICATION

WYNN'S® SUPREME +PLUS+ OIL TREATMENT

Formulated to:

- Prevent engine wear
- Retard oil oxidation
- Assure maximum lubrication protection
- Utilize Premium API SM/ILSAC GF-4 additive technology
- Enhance engine performance
- Provide added protection during engine break-in
- Neutralize harmful acids formed by the combustion of blow-by gasses and water
- Protect engine components from rust and corrosive wear
- Compatible with all API service classifications

| SUPREME +PLUS+OIL TREATMENT | |
|-----------------------------|---------------------|
| PART NUMBER | DESCRIPTION |
| #64328B | 24 X 11oz. per case |

WYNN'S® SUPREME +PLUS+ OIL TREATMENT

The Problem

Today's engines are smaller, lighter, have closer tolerances and operate under higher temperatures than engines of the past. These modern engines must not only be fuel efficient and produce low emissions levels, but must also maintain the performance and durability that car owners demand.

At the heart of the engine is its lubrication system, essential to efficiency, performance and durability. Engine oil must perform in the internal engine environment where factors such as heat, pressure and contamination affect not only its performance and useful service life, but the performance and life of the engine itself.

Further taxing the engine oil in these harder working engines are external factors such as severe driving conditions, increased driver neglect and extended/irregular oil change intervals.

The additives contained in even the best engine oils are depleted with use, making the use of supplemental treatments a wise choice for the motorist wanting the most from his or her engine. A proven engine oil treatment that adds this extra measure of protection to the basic formulation of today's quality motor oil is desperately needed by drivers striving for the utmost in performance, protection and durability.

The Solution

Wynn's® *Supreme +Plus+ Oil Treatment* is formulated to enhance the lubrication, protection and cleaning properties of engine oil. *Supreme +Plus+* helps increase oil life, reduce oil oxidation, thickening and breakdown, combat engine wear, reduce friction and inhibit rust and corrosion.

Supreme +Plus+ is formulated with premium API additive technology, including:

- **DETERGENTS/DISPERSANTS** to maintain engine cleanliness by preventing the accumulation of harmful deposits.
- **OXIDATION INHIBITORS** to retard oil thickening caused by high temperature operation and extended service intervals.
- **FRICTION MODIFIERS** to reduce friction and increase engine efficiency.
- **ANTI-WEAR ADDITIVES** to prevent engine wear associated with start-up and severe driving conditions. It will also boost the anti-wear ability of the engine oil which depletes with use.
- **RUST AND CORROSION INHIBITORS** to neutralize acids formed by combustion by-products and protect engine surfaces from rust resulting from water in the oil due to condensation.

Directions: Add to engine oil at each oil change or between oil changes as an oil revitalizer.
