Wynn Oil Company,

I felt compelled to write and tell your company about our experience with our new Trans Serve II transmission flush system.

Considering our success in the past four years using your fuel system cleaning chemicals, and our continued use of the Du-all antifreeze flush machine, we looked at purchasing a Trans Serve II Machine. The results have proven to be far better than we had imagined. We started with 30 services in the first two weeks. The following months have proven to be just as successful. Some customers have returned to say their car shifts smoother even though we sold the service as routine maintenance.

We think this service will continue to grow as a part of the complete car care package we offer. It's easy to use, thorough, and beneficial for our customers.

Thanks for creating this tool,

Jamie Hensley
